-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 13, line 2, “a fluidic cartridge assembly” is recited, however, this is indefinite since it raises double inclusion issues and is incomplete for omitting the essential structural cooperative relationship with the spray head. The fluidic cartridge assembly is part of the spray head, however, there is no limitation providing the structural connection or relationship between the fluidic cartridge assembly and the spray head.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Swanson et al.

Swanson et al discloses a swivel mount comprising a holder 117 including an opening in 136; a first retainer 130 with an axially extending tube 132 and a retaining member 131; a body

126 including an outer surface having a semi-spherical portion and an opening concentrically receiving the tubular portion, see Fig. 1; a seal 124a positioned in sealing engagement with the semi-spherical portion. The body 126 pivots relative to the holder 117.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Swanson et al in view of Marty et al.

Swanson et al discloses all the featured elements of the instant invention except for the body 126 configured to receive a fluidic cartridge assembly. Marty et al shows a swivel mount with a body 30 having a semi-spherical portion 32 and a fluidic cartridge assembly received in the passageway 37 of the body, see Figures 3 and 5a. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a fluidic cartridge assembly in the body of Swanson et al, as taught by Marty et al, since such a modification would facilitate the rotation of the water which would enhanced the production of air bubbles in the water.

Allowable Subject Matter

7. Claims 14-24 are allowed.

Art Unit: 3752

8. Claims 2-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Filipponi, Loyd et al and Perdreau et al show various types of spa spray assemblies.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Ganey whose telephone number is 571-272-4899. The examiner can normally be reached on 7:00-5:00; M, Tu, W and Th.
